GENERAL INFORMATION

SALE LOCATION: Sale will be held at Kist Livestock Auction, located one mile west of the Memorial Bridge on the east edge of Mandan. For the easiest route, take I-94 to exit 33 or 34 to Memorial Highway.

ACCOMMODATIONS:

Baymont Inn & Suites, Mandan701-663-7401
 The Ridge Motel, Mandan.....(701)-663-8686

TERMS AND CONDITIONS: Cattle will sell under the Standard Terms and Conditions as recommended by the American Angus Association.

HEALTH: Interstate health papers will be available on sale day.

TRUCKING: Free delivery on bulls up to 500 miles radius with total purchases of \$3000 or more.

INSURANCE: Will be available to be purchased on sale day and we urge all buyers to insure their bulls.

VETERINARY COSTS: Any veterinary costs incurred after the bulls have been purchased are the responsibility of the buyer.

WINTERING: Wintering arrangements are available on all the bulls. Bulls will be fed free of charge until May 1 after which there will be a charge of \$250. We highly recommend that you leave your bulls with us so that they can be fertility tested.

SEMEN TESTED: The bulls will be fertility tested and semen evaluated prior to delivery of the bulls.

SUPPLEMENTAL INFORMATION: A supplemental data sheet will be available with scrotal measurements, updated EPDs and final weights. Announcements from the auction block take precedence over catalog information.

LUNCH: Please join us for a complimentary lunch on sale day!

SIGHT UNSEEN: Can't make the sale, but would like to bid on the sale cattle? We recommend that you contact any of our sale representatives prior to the sale or bid online at www.frontierlivesale.com.

SALE PREVIEW: Stop by on Thursday, March 12 or Friday, March 13 and preview our sale offering at Kist Livestock Auction!

LOTS

Welcome!

Dear Friends and Cattlemen,

It gives us great pleasure to welcome you to our 55th Annual Production Sale! Wow! Has there really been 55 productions sales? Seems like just yesterday, my sister, Janet Dohrmann, and I were cleaning up, sorting and pushing bulls into the sale ring for our dad, Allen Opp, when he held the first one. Right from the start, Janet and I had a vested interest in the outcome. We both had bulls in the sale and raised out of our show heifers. It will be 8 years this March since mom and dad passed. I often wonder what Allen would have to say about a legacy that has resulted in two daughters, three granddaughters, six great grandsons, and two great granddaughters all involved in the purebred cattle industry!

Our family would like to start by thanking our many valued and loyal customers who have placed their trust and confidence in us to supply them with high-quality seedstock year after year.

Our long history in the business tells the story of customer satisfaction that is - and always will be - our highest priority! Approximately 80% of our buyers each year are repeat customers, some have bought our cattle for over 30 years. We greatly appreciate those folks who have patronized us for so many years. We also look forward to providing quality cattle to those who are willing to give us a try for the first time.

Richard and I are slowly cutting back our herd to make room for the Strommens, and therefore 10 super fancy yearling heifers from the heart of the Fast replacements will again be a top feature in this year's sale!

We believe strongly in the genetics that we produce. Throughout the offering you will find dams sired by our home grown bulls such as Fast-Strommen Reno 987, Fast Capitalist 414, and Fast-Strommen Payweight 845 to name a few.

We encourage everyone to stop by as we would be happy to show the cattle to you and allow us to help you find what you are looking for. This year DVAuction will offer live online auction for those of you unable to attend on sale day.

We have a great sale offering of bulls that are not creep fed. After weaning they are fed a high roughage - low concentrate ration. It's a ration which allows them to gain evenly and consistently without ruining their feet or jeopardizing their fertility. Our customers report that the life span of our bulls in their herds has been up to 5, 6 and yes...as much as 10 years!

We believe in producing efficient, practical and profitable Angus cattle. We strive for efficient cattle that are just the right size for their environment and still grow heavy calves. Practical cattle that calve easily, are quiet to handle, require less labor, and are easy fleshing to keep feed costs down. Profitable cattle that are affordable, but generate the kind of calves that feeder buyers demand.

So join us for our 55th sale! We eagerly look forward to shaking your hand, and visiting with new and old friends!

Sincerely,

Richard & Jamie Fast

Jeremy & Rachel Strommen

If we can be of any assistance, call us!

Fast Angus Ranch: (701) 843-8280

Richard Cell: (701) 391-6968

Jeremy Cell: (701) 260-7405.

Get a \$200 credit toward your total purchase if you come view the cattle prior to the sale and make a purchase!

Fast Angus Ranch is located 1 mile N and 3-1/2 E of New Salem, Exit 127 on I-94.

You may also view the cattle at Kist Livestock Auction, Mandan on Thursday, March 12th and Friday, March 13th.

We purchased No Doubt B94 from Hoover Angus, Ellston, IA, in their 2024 sale. He is a very masculine bull that is easy fleshing, smooth made with lots of base width. He's a structurally correct, well-balanced, very attractive bull, that has a very easy to handle, gentle demeanor. Our heifers bred to him calved fairly easy, while his calves out of cows show a great deal of power and performance. He has sired an impressive group of bulls that are like peas in a pod for style, structural correctness, great dispositions, powerful performance and elite foot quality. B94 is a definite foot improver and is one of the best structured bulls in the beef cattle industry.

Hoover No Doubt B94

We're starting the catalog with an upheaved, really attractive, well-made bull with a deep body and excellent muscle expression. If you like them fancy, here he is! He combines weaning performance with good calving ease EPDs. Suitable for heifers or cows. Dam is a first-calf heifer that is a deep, thick bodied All Pro daughter. He's in the top 20% for CED, 4% for SC, 20% for Doc, 20% for Angle, 15% for Marb, and 20% for \$G.

 Search the whole country and you won't find better docility than 5108. He's every bit a gentle as his sire and maternal grandsire and just as good looking. If you're in need of something that will not only put pounds on, but also bring a little more style and look to your calves, take a look at any of the B94 sons. They should be a sale day highlight!

 5118 is a really nice, long-bodied, smooth made, calving ease son of B94. I'll say it over and over that B94 is one of the most consistent sires I've ever seen! His first calf dam is a moderate framed cow that excels in udder quality and foot and leg structure.

Lot 16

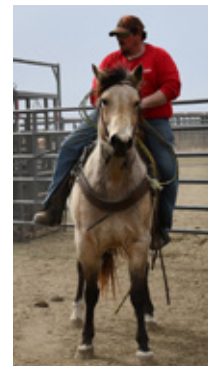

Are you wondering how a No Doubt B94 sired bull might work in your herd? Here are some prime examples from the Keller Ranch, New Salem, ND. Last year, Chris and Duane Keller Al bred a good portion of their commercial herd to B94 and these calves are the result.

"I think this is one of the best calf crops we have had here in many years," said Duane. "B94 really stamps his calves and makes them really uniform for size and shape. We bred him to Hereford cows and we got a lot of solid black calves as well as black baldies."

"I really like the B94 calves," said Chris. "and I hope to use a couple of his sons next summer."

Black Gold was purchased by Hunter Duckwitz, Belfield, ND, in our 2022 production sale. His first sons topped Hunter's sale and were so impressive that we decided to use him in our own herd. Black Gold adds weaning performance, extra depth of rib, muscle and length of body into his calves.

 A heifer with long neck and spine and good substance of bone. Dam is a good milking daughter out of the Star Maiden cow family and a half sister to the dam of Lot 101. Maternal grand dam is a 12-year-old cow still in production and the dam of Lot 100. Top 10% \$M.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

The Targeting the Brand™ logo can be used on any registered Angus bull with a minimum marbling EPD (Marb) of +.65 and Grid Value Index (\$G) of +55 or higher. Data from the American Angus Association show that these minimum thresholds for Marb and \$G achieve an average of 50% Certified Angus Beef (CAB) acceptance. The logo helps bull customers to easily find bulls with added carcass value.

Friends and Cattlemen!

Welcome to our 55th Annual Production Sale! Thank you again to new and old customers for taking an interest in our sale offering. What an exciting time to be in the cattle business! We've seen some of the highest prices for steers and heifers in our lifetime.

We have in the offering a tremendous set of stout, rugged and good footed group of bulls from the top 2/3 of our calf crop. The bulls, as in past years, have been bucket fed a high fiber, low starch ration with long hay with NO SILAGE. They have been developed to maintain structural soundness and hoof development.

We have added two new sire groups this year, "Mogck Defender" and "Glacier", that are very impressive! Once again, the "Elevate", Rainmaker, and "Magnum" sons offer volume, thickness, style and calving ease.

The bulls have been ultrasound scanned by Jason McLennan, Belle Fourche, SD. Data will be available sale day. The genomic-enhanced EPDs in this sale catalog are powered by Angus GS. We provide DNA and actual information to increase the accuracy of the EPDs for the bull you are purchasing and allows us to do a better job improving genetics and profitability. "Keeping your operation profitable is one of our top priorities!"

Bulls have been vaccinated with Vision 7 Somnus, Vista Once SQ, Fusoguard, Wart Vaccine and Express 5-HS and poured with Ivermectin. Bulls left for wintering will have a semen evaluation before delivery and we will be retaining a 1/3 semen interest in all our bulls. All bulls are fully guaranteed to be breeders.

Thank you for taking an interest in our cattle! Feel free to stop and view the cattle at the ranch any time prior to March 11, 2026, or at Kist Livestock thereafter.

Sincerely,

L..J. & Janet Dohrmann

Market topping steers from Ryan & Ashley Rebel herd. Sired by Dohrmann bulls and Mrnak Hereford Ranch influenced cows.

A "Big Thank you!!" to Corey Blaser for getting our bulls in good rig and looking fancy for the past 20 years. He is also the man that makes sure our feed gets delivered to the feed bin.

Watch for this feature sire in 2027!

Six Mile LDG Ovechkin 8M

Owned with Six Mile Ranch & Oxbow Ranch
Semen Available!

“Bulls left for wintering will have a semen evaluation before delivery!”

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. EPDs are updated weekly. To see the most current EPDs, look up the registration number on angus.org.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

PRODUCTION

Calving Ease Direct (CED), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Dry Matter Intake (DMI), expressed in pounds per day, is a predictor of difference in transmitting ability for feed intake during the post-weaning phase, compared to that of other sires.

Yearling Height (YH), expressed in inches, is a predictor of a sire's ability to transmit yearling height compared to that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting scrotal size compared to that of other sires.

MANAGEMENT

Claw Set (Claw), expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes compared to another sire.

Foot Angle (Angle), expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth compared to another sire.

Docility (DOC), expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

Pulmonary Arterial Pressure (PAP), expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

Hair Shed (HS), expressed in units of hair shed score, with a lower EPD being more favorable. This indicates a sire should produce progeny who shed their winter coat earlier in the spring and has improved environmental adaptability in heat stressed areas and grazing endophyte-infected (hot) fescue.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), expressed in pounds of calf weaned, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters. In other words, it is the part of the calf's weaning weight attributes to milk and mothering ability.

Teat Size (Teat), expressed in units of teat size score, with a higher EPD indicating a sire will produce daughters with smaller teat size compared to that of other sires' daughters.

Udder Suspension (UDDR), expressed in units of udder suspension score, with a higher EPD indicating a sire will produce daughters with tighter udder suspension compared to that of other sires' daughters.

Functional Longevity (FL), expressed in number of calves, is a predictor of the number of calves a sire's daughters are predicted to produce by 6 years of age compared to that of other sires' daughters. A higher EPD is the more favorable direction indicating more calves produced on average.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

CARCASS

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

SVALUE INDEXES

SValue Indexes, expressed in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The SValue is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (SM), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning by decreasing mature cow size and improving docility, foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (SW), expressed in dollars per head, provides the expected difference in future progeny pre-weaning performance from birth to weaning.

Energy Value (SEN), expressed in dollar savings per cow per year with a larger value being more favorable. It assesses differences in cow energy requirements, due to maternal milk and mature cow size.

Feedlot Value (SF), expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle through the feedlot phase and sell on a carcass-weight basis.

Grid Value (SG), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (SB), expressed in dollars per carcass, represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

Combined Value (SC), expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (SM) and Beef Value (SB) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

NOTES

It Means a Lot to Us

By Jamie Fast

It means a lot to us that you rose early to get the chores done to travel so far and attend our sale,

It means a lot to us that you left your wife/daughter/son to watch over those calving heifers and cows,

It means a lot to us that you arrived early to carefully check out every pen of bulls,

It means a lot to us that we got to shake your hand, answer your questions and invite you to take part in our lunch,

It means a lot to us that you expressed your appreciation for our genetics and sale offering,

It means a lot to us that you participated to help us celebrate our 55th Annual Sale,

To our many loyal customers, dear friends and family...we thank you!
